

LINUS led light-handrail for indoor

leather - wood - metal pampers with a beneficial and pleasant grip feeling

The visual and haptic communication starts at the entrance of a house by creating the initial impression. A perfect medium for a positive impression is the light-handrail LINUS because it is not only the surprise effect of a sophisticated illumination but also the haptic feeling is pampered by a beneficial and pleasant grip feeling. Its wide range of surfaces of metal, wood veneer or leather meets the highest standards.

„Illumination pur „ is guaranteed by a novel way of integrating lamps into the handrail. The steps are efficiently illuminated by the overhead rail-lamps. The stairs as a whole are illuminated, which results in higher energy-efficiency and lowers the respective costs.

LINUS incorporates
4 well proven and important safety features:

- a solid aluminium handrail with
- built-in downward looking illumination and
- an emergency lighting system when needed
(according to your specifications).
- aristo led temperature monitoring

All of this above including the preinstalled wiring is mounted in one handrail.

The costs for this elegant system are comparable to a normal solution because to a rail without lights. Have to be added the extra costs for staircase luminaires, extra emergency lights and extra mounting costs. Because of these costs will disappear this system is so highly efficient and cheap. And last but not least here are the secondary advantages

sustainability:

- easy dismantling of the luminaire
- all parts possible to get as spare parts
- all parts sorted recyclable
- no light waste, because the light is focussed towards the steps

image gain:

- a friendly bright welcome creates trust
- recognition by this sophisticated light solution
- good technical features generate higher property value
- the warm feeling of safety by a bright staircase lighting

LINUS led light-handrail for indoor

leather - wood - metal pampers with a beneficial and pleasant grip feeling

LINUS creates a unique and downward propagating light ambiance. This is the result of the well designed integration of lamps into the sturdy handrail of your stairs.

The steps are homogeneously illuminated in a glare-free manner from above:
A curtain of light embraces the whole length of the stairs without obstructing shadow effects. The stairs as a whole are illuminated with lower the respective costs and resulting in higher energy-efficiency.
In combination with a PV-installation LINUS guides you save out of the building in case of a general black out.

Low operation casts are ensured by our propriatory energy saving design in connection with the lamp guarantee of 50'000 h by CREE inc..

LINUS is ideal to retrofit poorly illuminated stairs. The installation of LINUS is simple:
Since the wiring is pre-installed in the handrail you only need to enter and connect one cable. Additional rail-elements will be connected via plugs. Comprehensive installation instructions are included with the shipment of the rail.

Use the advantages of LINUS for:

- stairs, ramps and entrances
- homes, public buildings, hotels
- faires, sports arena, schools
- hospitals, residences for senior citizens
- you name it!

LINUS is a stylish system with a lot of detail solutions and flexible lenght. The 3 safety features: Handrail, staircase lighting and emergency light, elegant combined to only one part, are mounted all at once. This saves time and money. It is an eye-catcher which causes inevitable admiration by the effect of light – for certain a long lasting positive impression.

The LINUS light-handrail is the right decision.

We are looking forward to discussing your next project and will be happy to consult with you and to work out a quotation for a state-of-the-art LINUS light-handrail.
