

Light-handrail LINUS
indoor

cost comparison

primary advantages:

light-handrail LINUS

- light-handrail
- prepared emergency lighting
- staircase lights already integrated
- CREE-leds with lifetime guarantee
- light over the whole staircase length
- prewired and ready
- fulfills the legal requirements
- saving energy by the short distance luminairey - step

standard solution

- handrail without lights
- extra emergency light
- extra staircase lighting
- lamp lifetime guarantee ?
- at least 2 luminaires
- laying electric cables to the luminaires
- mounting luminaires
- connection of luminaires

The costs for this elegant system are comparable to a standard solution because to a rail without lights have to be added the extra costs for staircase luminaires, extra emergency lights and extra mounting costs. Because of these costs do not exist this system is so highly efficient and cheap. And last but not least here are the additional secondary advantages

secondary advantages:

sustainability:

- easy dismantling of the luminaire
- all parts possible available as spare parts
- all parts sorted recyclable
- light is focussed towards the steps, no light waste

- reparable ?
- spare parts ?
- disposal: recyclable ?
- useless broadly scattered light

image gain

- a friendly bright welcome creates trust
- recognition by this sophisticated light solution
- good technical features create higher property value

- usual appearance
- image gain ?

safety

- bright staircase light: glare-free, multiple lamps, free of clouding
- emergency lighting below smoke clouds due to low installation height of the light-handrail

The luxury of today is the standard of tomorrow. LINUS is an eye-catcher which causes inevitable admiration by the effect of light – for certain a lasting positive impression.
